HOW TO WRITE A SONG IN 5 STEPS

2019 Guide

- 1. START WITH THE MUSIC**
We have a few options to go from here, but their most common — to create a skeleton of the song that is called chord progression.
- 2. MELODY**
The good way to make a melody is humming absurd syllables just to understand how text and music can complement each other.
- 3. LYRICS STARTS HERE**
Complete and strengthen your melody's mood with words and build lyrics around your music.
- 4. FINALIZING THE SONG**
Try to find the best and worst parts of the song. If you don't like any part of your music, that means that you know that this part can be better, so just work on it.
- 5. FIND YOUR OWN WAY**
There is no secret formula for good music. The only common thing that unites every song which was ever written is hard work.
